

ABSTRACT

An insulated electric power cable having an insulator layer formed by extrusion-coating and cross-  
5 linking a cross-linkable resin composition, which contains a polyolefin blended with a total of 0.05 to 0.4 parts by mass of at least one compound selected from the group of compounds such as N,N'-(4,4'-diphenylmethane)bismaleimide, based on 100 parts by mass of the polyolefin, and a  
10 prescribed amount of an organic peroxide cross-linking agent.
